# Raised basin mixer

# Installation Instruction

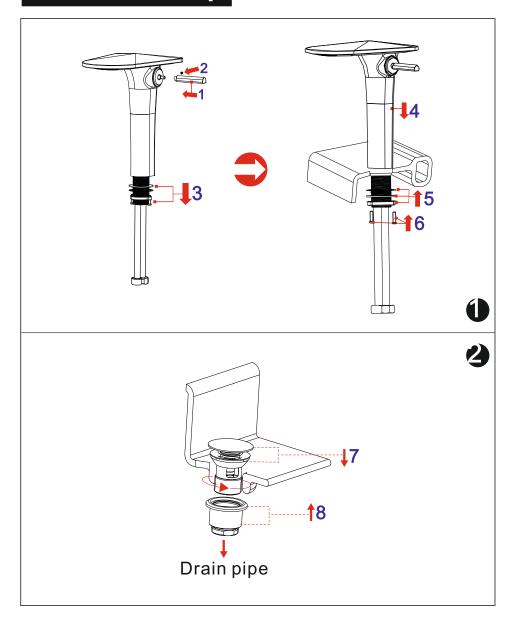

Please read this instruction carefully to avoid any difficulty during installation.

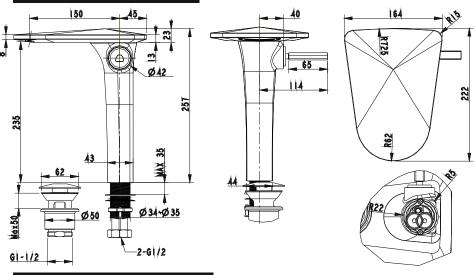

#### **Components List**

| No. | Component                      | Quantity |
|-----|--------------------------------|----------|
| 1   | Sealing ring                   | 1        |
| 2   | Net                            | 2        |
| 3   | Flow rate strengthener         | 1        |
| 4   | Plate                          | 1        |
| 5   | Female allen screw             | 2        |
| 6   | Spout                          | 1        |
| 7   | O-ring                         | 1        |
| 8   | Union                          | 1        |
| 9   | O-ring                         | 1        |
| 10  | Flow rate restricter           | 1        |
| 11  | Ceramic cartridge              | 1        |
| 12  | Fastener                       | 1        |
| 13  | Washer                         | 1        |
| 14  | Escutcheon                     | 1        |
| 15  | O-ring                         | 1        |
| 16  | Female allen screw             | 1        |
| 17  | Handle                         | 1        |
| 18  | Main body                      | 1        |
| 19  | Spring shim                    | 2        |
| 20  | Cross-head screw               | 2        |
| 21  | Setting pin                    | 2        |
| 22  | Longerpipe                     | 1        |
| 23  | Bolt                           | 1        |
| 24  | Fastening nut                  | 1        |
| 25  | O-ring                         | 1        |
| 26  | Washer                         | 1        |
| 27  | Fastening washer               | 1        |
| 28  | Thread pipe                    | 1        |
| 29  | Fastening nut                  | 1        |
| 30  | Cross-head screw               | 2        |
| 31  | Flexible connection hose(red)  | 1        |
| 32  | Flexible connection hose(blue) | 1        |
| 33  | Pop-up waste                   | 1        |

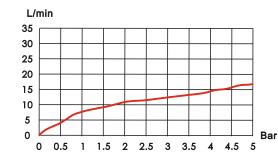

# Installation Step

#### **Installation Fig**

### Flow rate Curves

Test pressure: 1.6MPa (16bar)

Flow pressure:

Min 0.05MPa

Max 1.60MPa

Recommended pressure:

0.1MPa to 0.8MPa (1 to 8 bar)

#### Note

- 1. Ensure proper cleaning of the water supply pipe before installation to avoid any jammed.
- 2. The cold-water supply must be connected on the right and the hot-water supply must be connected to the left.
- 3. Check the installation dimensions according to the Figure and ensure it is installed correctly.
- 4. Hot-water inlet temperature must not be over 80°C.
